- Hyperlipoproteinaemia type 1
- Long chain fatty acid oxidation defects (LCHAD)
- Intestinal lymphangectasia
- Chylothorax & chylous ascites
- Intractable malabsorption with steatorrhea
- Cystic fibrosis
- Short bowel Syndrome
- Fat malabsorption due to liver disease
- Gastrointestinal disorders

Kindergen 400g Can

Description

Kindergen is a nutritionally complete powdered feed containing cow's whey protein, carbohydrate, fat, vitamins, minerals and trace elements with low* levels of potassium, chloride, calcium, phosphorus and vitamin A.

Indications

Kindergen is specifically designed as a sole source of nutrition or as a supplementary feed for the dietary management of infants and children with chronic renal failure where peritoneal rapid overnight dialysis (PROD) or continuous cycling peritoneal dialysis (CCPD) is required. In order to minimise the risk of bone disease, the phosphate level was designed to be low and the calcium level adjusted accordingly to give a calcium to phosphorus ratio of 1.2:1. Other modifications include slightly higher sodium and higher percentage of calories from fat. Suitable from birth onwards.
